March 18, 2020

To all members of the public, partners and staff.

As this unprecedented COVID-19 situation evolves around the world, in Canada and here at home in Yukon, we are all faced with the reality that life will be different for the foreseeable future. All citizens are being asked to continue social distancing and not gather in groups to help curve the spread of this illness.

Needing to be part of the greater effort and in the face of yesterday afternoon's announcement that our two largest neighbours to the south declared states of medical emergencies and the likely spread of this virus into Yukon. It has become apparent that indoor or outdoor facilities with any chance of causing close contact of members of the public should no longer operate to insure the health and safety of everyone.

We at Mt. Sima take our role in the community and the health and safety of our staff and public very seriously. With that in mind, **effective immediately Mt. Sima will be suspending all public access and winter operations.** This closure will extend to May 1st and will bring our winter season to an end.

I personally want to thank all Yukoners for their amazing support over this 2019-2020 season. To our amazing staff, board members, sponsors and volunteers; thank you so very much for all your hard work, dedication and professionalism. Without you, this magical little big hill could not happen.

We look forward to the summer season of biking and the team will be preparing for yet another amazing winter season to come.

Thank you,

Sam Oettli
